

M-Files 7.0 upgrade package

Upgrade your M-Files to the newest version with our turnkey service

Let one of our systems specialists upgrade your current M-Files system to the latest version safely and easily. During the consultation engagement, you will learn to utilize all the new features of M-Files 7.0. Check out all the new features at www.m-files.com/7.0.

We offer comprehensive high-quality consultation services for M-Files, as well as other IT infrastructures. Our proprietary software, M-Files, is our main expertise area, but we can also handle Microsoft products like: Windows, Active Directory, SharePoint, Exchange, SQL Server, Office, Dynamics CRM, as well as others.

We also have background experience in security systems and policies, numerous kinds of databases, networks, other Windows and web applications, ERP, CRM, PDM, Project Management Systems and integrating all the above with M-Files DMS.

Upgrading to M-Files version 7.0 is easy with this package.

Our systems specialists will handle all the necessary installations or assist your system administrators in doing so. Then, they will demonstrate how to take advantage of all the new features of M-Files 7.0

Contents of the Upgrade package:

- Safe upgrade and setup of M-Files Server 7.0
- Direct connection to our development team in error situations
- Investigation/Verification of current backups and backup schedules
- Investigation/Verification of vault database optimization
- Investigation/Verification of event logs for possible problems/errors and to suggest solutions
- Vault structure analysis (e.g. removal of unused document classes, properties and value lists).
- Benchmark the performance of your vault. Suggest solutions to improve the performance.
- E-mail and phone support in problem situations
- Overview of new features of M-Files 7.0 for system administrators
 - Easy saving of e-mails from Outlook to M-Files by dragging-and-dropping
 - View enhancements eases finding documents (For example viewing documents based on a customer's country)
 - Viewing object relationships hierarchically (e.g. Viewing customer documents and contact persons in the same listing)
