

M-Files 8.0 New Features Webinar

M-Files helps businesses succeed in today's fast-paced information-intensive environment by improving efficiency and maximizing the reusability of information.

The development of M-Files 8.0 focused in particular on large entities, such as versatile management and automation of permissions, implementation of various standards and types of instructions with M-Files, and reporting and analysis of information by means of data saved in M-Files. M-Files can now be accessed also by mobile device (M-Files Mobile Access) while Web publication also provides some new functions.

As a result of close collaboration between M-Files Corporation and Microsoft, M-Files Cloud Vault is available as an Azure cloud service, and both online and on-the-premises components are integrated with Dynamics CRM.

With the new release, we wish to provide our customers with many useful ways to develop and improve operational efficiency. M-Files 8.0 offers exactly the right tools and functions for this!

M-Files 8.0 offers a variety of new features and enhancements, including:

- ✓ M-Files Cloud Vault is now available on the highly secure and scalable Windows Azure cloud platform.
- ✓ Integration with Microsoft Dynamics CRM 2011 (Online, On-premise and hybrid deployments) with M-Files cloud and on-premise components.
- ✓ Reporting features and tools for improved tracking, analysis and Business Intelligence.
- ✓ Search enhancements, including improved organization of search results based on relevance criteria, such as creation and modification dates, or how many times documents have been accessed or modified.
- ✓ Metadata-driven permissions, allowing automatic modification of access rights based on changes to metadata, for instance, granting access to a larger group when a document is approved for distribution.
- ✓ Enhanced FDA Title 21 CFR Part 11 compliance support, required in industries such as pharmaceutical and medical device manufacturing, biotechnology, biologics, and related industries (note, this is also supported with M-Files 7.0).
- ✓ Mobile access to M-Files vaults provides read access to documents supporting intuitive touch gestures.
- ✓ Publishing enhancements for providing access to documents over the Internet via M-Files Web Access.
- ✓ Compatibility with Autodesk AutoCAD and AutoCAD LT 2012.
- ✓ Support for all scanners (also for those using TWAIN drivers).
- ✓ New language versions: Czech, Bulgarian, etc.

The M-Files 8.0 webinar offers a great opportunity to learn how to utilize M-Files more effectively. The webinar is primarily aimed at M-Files power users, administrators and in general to all persons responsible for M-Files document vaults and their development.

In the webinar the new features of M-Files 8.0 will be presented and discussed in greater detail. The goal of the training is to offer extensive knowledge of the new features in M-Files 8.0. Participants will also get the necessary knowhow to train the other users in their organization about the new possibilities offered by M-Files.

For more information, read the detailed schedule in the next page.
